

## News Release

### **Transtelco Connects with CENX to extend Ethernet Services to Key Mexican Locations**

*Transtelco establishes global reach with new CENX connection*

El Paso, Texas, / Ciudad Juárez, Chihuahua, May 19 2010 – [Transtelco](#) today announced that it is turning up a connection in Los Angeles with [CENX](#), operator of the world’s first Carrier Ethernet exchanges. Connecting with CENX’s Carrier Ethernet Exchange enables Transtelco to reach locations throughout the US and around the world. Transtelco can now offer new types of services over a significantly wider range of locations to much better serve end-users in Mexico and the USA. The CENX connection also enables US based service providers to efficiently reach businesses based in regions served by Transtelco.

“Connecting with CENX enables US based service providers to quickly and efficiently reach end user locations connected to our Mexican and US networks,” said Edgar Mosti, Vice President of Wholesale, Transtelco. “This is also an extremely effective means to better serve our Mexican based end-user customers at their locations throughout USA and beyond.”

Carrier Ethernet represents an important means of delivering a wide variety of new services offered by Transtelco and enables new high performance applications for Transtelco’s customers. Interconnecting with other carriers via CENX enables Transtelco to serve a much wider range of customers located outside Transtelco’s serving area. CENX’s Carrier Ethernet expertise was a key factor in Transtelco’s choice of an exchange partner.

“We are very proud to partner with Transtelco; their presence in the CENX Los Angeles Exchange is a great example of our strategy: introducing and assisting new Ethernet Service Providers in building their Carrier Ethernet-based business with local connections that reach globally,” said Eric Gillenwater, Vice President, Worldwide Development. “CENX’s Carrier Ethernet exchanges are the world’s first operational service-level interconnects. By leveraging several unique technical innovations and our years of Ethernet expertise, CENX exchanges bring the exciting opportunity of introducing new value-added services by our member/partners such as Transtelco.”
